The Big Bang

Robert Ramskill

$\text{♩} = 116$

7

1. The sun, the stars, the planets, the
me-tears and the co-mets, the

10
as-ter-oids as well; our u-ni-verse be-gan back then, who
ga-la-xies and sky, they all be-gan in emp-ty space in the

12
1. cast that ma-gic spell? 2. The twink-ling of an eye. It was the

14
Big Bang! So the ex-perts say,

17
that cre-a-ted our u-ni-verse, then the sun and the moon and the **To Coda 2nd time**

20
mil-ky way. It hap-pened so ma-ny bil-lion

25
years a-go, from a ti-ny speck in the night. Since

28
then the u-ni-verse has grown and grown, ex-pand-ing at the speed of

31
light. **D.S. al Coda** Ⓢ **CODA**

36
mil-ky way; the mil-ky way; It was the Big Bang!
